Teaching your children to read and write can be an exhausting task if you do not know how to approach them. Most children are shy and teachers might have a hard time interacting with them. Fortunately, there are certain software solutions that can help teachers and parents approach their children in a different matter in order to improve their reading and writing skills. Moo-O is a fun to use application that can help you educate your children and improve their reading skills, by using animated and interactive stories, played by various characters. This way, children will find it easier and funnier to interact with animated characters. The application requires a webcam, a microphone, Internet connection a Moo-O account in order to work properly. Interactive story teller The application uses short movies and stories in order to improve children reading skill. This tool can easily be used by teachers and parents alike. Each story contains several acts, played by one character at a time. You can assign “actors” to each character, who are usually represented by a child. For each scene the program displays a text which is intended to be read aloud by children. The text can be converted to speech with a click of a button, so that any child that is having reading difficulties will be able to hear and reproduce it. When reproducing the text of each scene, the child will be recorded in order to be verified for pronunciation exactitude. A reliable educational tool Moo-O is an interactive tool that allows you to teach children how to read and write. Using interactive movies, you can even create a roleplay between children, by assigning each one with a story character, thus making them associate learning with a fun game.
