KEYMACRO is an intuitive macro recorder for Microsoft Windows. It is a Windows utility designed to speed up repetitive tasks on a Windows computer, saving the laborious process of retyping the same commands over and over again. As Mac users, we are all familiar with the friendly and easy-to-use features of the Finder. Unfortunately, the Finder is one of the few graphical applications that has been available for Windows users for some time. In contrast, Microsoft Windows is not an easy operating system to manage. In fact, many Windows applications are considered cluttered and difficult to use, and it takes time for the user to figure out how the system works. For years, Microsoft has been looking for a utility that would be the Finder for the Windows world. Although the idea may have been great, Microsoft was unable to find the right mix of functionality, and the market for such a product failed to appear. However, Microsoft is revisiting the idea of the Finder for Windows. With the release of Windows 7, Microsoft has created new versions of Windows Explorer that are intuitive and easy to use. They are designed to help the user find and navigate to files and folders without any effort. However, Microsoft also included new features that will give the user the ability to keep track of all the files and folders. As a result, the best Windows solution is now available to Mac users as well. Indeed, we have discovered the very first KEYMACRO: a Mac utility designed to perform all the functions of the Microsoft Windows version of the Finder. KEYMACRO is an intuitive macro recorder for Microsoft Windows, saving the laborious process of retyping the same commands over and over again. We decided to create a portable version of the product, one that works directly on your Mac. The application does not require a Windows computer. Indeed, it is a standalone application, designed to work on any Apple-compatible Mac computer. It also includes features that make it the ideal solution for the novice user as well as for those who have a lot of experience with Mac OS X. In addition to its Mac version, we have created a Windows version of KEYMACRO. This version is designed to take advantage of the latest Windows tools and resources, allowing the user to save time by performing repeated operations more quickly and easily. KEYMACRO has the following features: Mac version: • Simple design • Advanced functionality • Save money by reducing repetitive operations • Removes the need for external tools to facilitate your work
