Q: How do I select the last post in a category? I want to select the last post in a category. Can someone give me some direction? Or does anyone know of any plugins that can do this? A: As far as plugins I use two — Featured Posts on Category page Advanced Custom Fields Featured Posts on Category page: Demo Code Simply install this (latest version) and paste this code at your category.php template. The :last class is needed for post.php template, but when the category.php is used, post doesn't have the ID so there is no need to use the :last class in this case. Note: 1.6+ version of ACF supports multiple posts in a category and you can use 'with_replies' => false to avoid an error for that specific post. If you still want to get the latest post only, then you can edit post.php at the bottom to check the number of replies and display only the latest. NOTE: The 'render_extended' => true is not needed at the category.php, but the category.php is used for both category and archive. Advanced Custom Fields: Demo Code Download and

install the plugin. Go to the ACF Custom Field settings and add a new field to this category and set the 'On Category Pages Only' to yes. Then edit the category.php and add the following code to get the last post in a category. "> Note: If your theme has a gallery, then you can't get the number of posts and can't get the last post in a category or your category's gallery will display no posts. A:

How to Make a Holiday Cookie Tree By Cheryl Comins
Holiday parties are known for their food. From finger foods to full-fledged spreads and platters, holiday foods can be the focal point of any celebration. When designing party foods for the holiday season, think about the children, as most of the food is already made or purchased. Making a holiday cookie tree is a great way to start your holiday party off on the right foot with the children. Things You'll Need: Wooden cookie cutters Wax paper Baking sheet Wooden star cookie cutter Cookie cutters Ruler Glue Hot wax Ribbon Wooden star

cookie cutter X-Acto knife Cake decorating kits Ribbons, bows and other holiday decorations

Step 1 Cut the cookies into the proper shapes with your cookie cutters. Set the cookies on the baking sheet and place in the refrigerator to cool.

Step 2 When the cookies have cooled, use your wood star cookie cutter and the rounded side of your cake decorating kit to create a star shape. Holding the star on a flat surface, apply a coat of hot wax to the star sides using a brush or paint roller. Cover the entire surface with the wax, being careful not to pull the star shape out of shape.

Step 3 Once you have applied all the hot wax, let the star sit on the wax to cool. The star is now ready for attaching to the cookie tree.

Step 4 Use your wooden star cookie cutter to cut a small hole in each of the star points. If you are using a paint roller, first coat the star with the hot wax; then place a piece of cardboard on top and roll with the paint roller to apply the paint.

Step 5 Place the star on the tree trunks with the star points facing up. Place the star in the open cut-out of the cookie tree.

Step 6 Continue cutting small star-shaped holes in the tops of the cookie trees to attach the stars. Allow the stars to dry for 30 to 60 minutes.

Step 7 Once the stars are

dry, glue the stars to the tree with a small amount of hot glue. Step 8 Add the remaining cookie trees to the cookie tree with the star. Step 9
