Fast SMS Send Crack +

Use this text messaging program to send text messages from your computer to the people you choose, even if the latter don't have Fast SMS Send. Send an unlimited number of texts to people and organizations in your address book. This is a Windows 98/2000/XP/Vista compatible application. Now, the secret of its popularity is easily discovered. Not only does Fast SMS Send come at a small price, but it also offers quite a lot of functions, like multiple contacts, customizable time intervals, and even serial port and modem testing. If you are ready to click on the Start button and start sending text messages, the time is right! Send multiple text messages to people using this tool in no time Using Fast SMS Send to send text messages is very easy. You just need to enter the necessary information and then start the process. To send a message, just click on the Start button, then choose your destination and choose the number of the message you wish to send. One nice feature of this text messaging program is its time interval feature. You can set a time out for the text messages you send. It is possible to receive or send them at any given time interval. The software also allows you to add up to 10 contacts in your address book. The software then makes it possible for you to send an unlimited number of texts to the chosen contacts. As a matter of fact, you can even have multiple groups within the software. One problem that most people find is that some people may be in between the line. We know that not everyone uses a phone and others are always connected to the phone through a device. Here is the catch, you have to have a certain type of modem that allows you to connect to the Internet. Most people usually use a telephone modem. That is why, as stated in the description, the tool is compatible with serial ports and attached modem devices. Fast SMS Send Windows 98/2000/XP/Vista Designed for computers running Windows 98, Windows 2000, Windows XP and Windows Vista operating systems. Size: 1.07 MB Installation: Click the download button above to download the latest version of Fast SMS Send software to your PC. You can click on the Start button to begin the installation of the software. Easy Backup Pro provides easy backup tools for Windows (WinPE, Recovery Console, PXE and WinPE CD). Easy Backup

What's New in the?

Fast SMS Send is a software app that was developed specifically in order to help individuals send text messages, through installed serial ports and attached modem devices. Advantages of portability This tool is portable, which means you can easily skip the installation process. If you place the program files to an external data drive, it is possible for you to run it on any computer you can connect to, by simply clicking the EXE. Another aspect you might deem important is that Fast SMS Send is not going to add files to your hard drive or Windows registry without asking for your permission, and after you remove it, there will be no traces left behind. Cluttered interface The interface you come by is a bit crowded, as all the options available in the program are displayed here. This might prove to be a bit confusing for novice users. Moreover, there are no Help contents they can access so as to figure out how to get around it. Send text messages at a specified time interval This software utility enables you to send SMSs of maximum 160 characters, and it is also possible to automatically send them from TXT files (located in the app's folder). Both can be sent automatically at a user-defined time period (expressed in seconds). The time out can be specified, ports can be tested and you can add an unlimited number of contacts and organize them in groups. Conclusion To sum up, Fast SMS Send is a fairly efficient piece of software which allows you to send messages to family or friends through a serial port or attached modem device. It has a good response time and it does not hamper the computer's performance. However, it could use a little bit more work. FAST SMS Send is a software application that was developed with the purpose of helping users send text messages through serial ports and attached modems.
