The study was based on the results of experimental and clinical investigation of the permanent tooth occlusion in children. The occlusion of the permanent teeth of children with the tendency to bruxism were investigated. The main factors determining the occlusion were determined, the general clinical examination of children at risk of occlusion dysfunction was conducted. It was found that apart from the side tooth contacts of the permanent teeth occlusion function of the stomatognathic system is provided by other parameters, i.e. so-called relines of occlusion.Bitcoin (BTC) needs to move beyond its bear market to make significant price gains in the long term, according to analyst and trader Alex Krüger. Writing in a new commentary published Oct. 23, Krüger argued that bitcoin's recent drop from \$9,000 to \$6,000 shows that the cryptocurrency "is still in a bear market." "While most expect a rapid recovery, the fact is that bitcoin is not yet in a recovery phase," Krüger told his Twitter followers, explaining that the current price movement has been "due to an important event in the past two weeks." That event, according to the analyst, was the long-awaited move from a 1MB to 8MB block size hard fork, which is expected to take place on Nov. 15. Krüger explained that, while 1MB hard forks are generally considered to have a neutral effect on the market, 8MB hard forks have a "clear, negative effect" on prices because they enable a mining node to reach greater computational power. The analyst concluded that the addition of this computational power to the network brings with it additional security, but also has the effect of devaluing the total bitcoin supply. "In the past weeks, I've discussed a rough estimate that around 50 percent of the bitcoin market cap was owned by

What's New In OpenIPSW?

Apple iOS 7.0.3 is out! Now you can upgrade your phone to the latest firmware. The firmware is a complete replacement of the 7.0.2 firmware released earlier this month. What's new in iOS 7.0.3: iOS 7.0.3 is a full iOS 7 upgrade that introduces new interface elements, new look, and bug fixes. iOS 7.0.3 is a clean upgrade. No new framework, no new architecture, no new features. The only thing that is new in iOS 7.0.3 are updated icons and new artwork. To upgrade, you must first make sure your iOS 7 device is running iOS 7.0.2, then connect it to iTunes and open it up. In iTunes, choose "Check for Update" from the iTunes Store screen. Next, you will be asked to update your software. If you already have the software installed, the update will be skipped. If not, the software will be downloaded and updated. During the update process, you can plug your device into your computer to transfer the data over Wi-Fi if possible. You can also use your iPhone, iPad, or iPod touch for an update if Wi-Fi is not available. After the software update is finished, disconnect your device from your computer, then choose "Restart" from the Home screen. Depending on your configuration, you will be asked to complete a few steps on your device. To learn more about updating your iOS device, check out the "Your iOS Device - Update" section of the iOS 7.0.2 release notes. Please note: You must have iTunes installed to use the "Check for Update" feature. Apple iOS 7.0.3 is a clean upgrade. No new framework, no new architecture, no new features.
