The problem is that I am using generics and want to create the method in terms of the class I am using, but also in terms of the class it implements. Here is an example of what I have at the moment: class MyClass { interface InterfaceA {} class InterfaceB {} public void update(InterfaceA a, InterfaceB b) { // Do stuff } } I would like to avoid creating a new method every time I create a new class, for example MyClass extends MyClass. I want it to always be the case that the first generic in the method will be the class of the object being updated, and the second will be the class of the argument it's passed. Is this possible? On Sunday, May 5, 2015, the team made history once again when our squad clinched the Western Conference title with a thrilling 95-88 win over the Oklahoma City Thunder. The victory wasn't as dramatic as the championship game in 1975, but the Warriors hung onto the league lead for most of the season. Head Coach Steve Kerr was asked about what he told the team to stay level headed and motivated to keep their winning streak going. "We told them we were going to give them a locker room like it's Christmas morning," said Kerr. "The players were very excited. There was a lot of positive energy and they know the team has done this for a while. When you give a team like that a chance to have a great locker room, it was fun for everybody." It's been a great run of games for the Warriors so far this season. But the team hasn't always been perfect, nor has Steve Kerr been perfect. Kerr was also asked about a controversial play by Steph Curry at the end of the Game 3 in Houston that was so far offside that it forced him to hold the ball. Kerr was also concerned about defensive lapses in the early part of the season. Despite his reservations, Kerr was still able to shake off any lingering bad vibes from the Game 3 in Houston. "I was upset for him," said Kerr. "But it's all part of the game and, you know, he's fine. I think the team and the organization have been doing an incredible job and I think that's why we're winning. It's been fun to watch."[The effect of the intravenous infusion of the fat-soluble vitamins on the biochemical indicators of lipid metabolism].
