### Sakura Editor Crack Activation Code Download PC/Windows

Sakura Editor is a Windows text editor that can be used as a stand-alone application, embedded into the Windows desktop and/or accessed via a built-in file manager. Like any other text editor, it allows you to perform editing tasks on documents like writing, pasting, search and replace. But its main selling point is the GUI, which reflects the same design criteria used in the Windows 7 UI. Additionally, Sakura Editor includes a wide variety of advanced editing features, such as multi-tabbed documents, live search and replace, Unicode support, change the document's encoding, etc. The program can be used to create documents with text and graphics, and it can also display multiple documents at the same time. What is great about it is that you can work on multiple documents at the same time. Sakura Editor Features: [Backup] - Enables you to back up your existing document before you edit it, and import the backup copy back into the program. [Compare] - Opens a tabbed dialog allowing you to compare the current document with the backup copy. [Convert] - Converts the document from one file format to another. [Customize] - Changes your folders to fit your own file structures. [Customize] - Changes your folders to fit your own file structures. [Delete] - Deletes the current document. [Exit] - Enables you to exit the program without saving the document. [File] - Opens a menu to allow you to open your documents. [Format] - Changes the document's appearance using a variety of preset formatting styles. [Help] - Opens a small help menu containing a number of options. [New Document] - Creates a new document and opens it for editing. [Open] - Opens an existing document. [Path] - Changes the program's current path. [Print] - Displays a prompt to select the printer. [Properties] - Provides a list of properties for the selected text. [Quit] - Exits the program without saving the document. [Replace] - Allows you to replace text with an alternative, without making the text appear as bold, italic or underlined. [Save] - Saves the document before you quit. [Selection] - Displays the text in the currently selected range. [Search] - Begins a search for text in the document
