New Exhibition Mode: World Class Show off your talents in this new Exhibition mode. Play through all the nations and take on the nation's coaches in FIFA Ultimate Team challenges. Pick your squad, set up and take on the coach in an all new Exhibition Mode. All new Tactical Defending System – The Ball is where you will win The defensive system has undergone an extensive revamp in FIFA 22. More pressure will be put on opponent strikers by the Tactical Defending System, and this will force your defenders to make smarter

decisions, intercept play or slow down the ball through clever positioning. These new defensive techniques will be reflected in a variety of new tactics including: Defensive Pulses, the Quick Long Pass, Effective Ball Control, Rapid Offensive Attacks, and Directional Playing. Make fast decisions with ball control Just like in real-life, players will pick the ball up quickly, carry the ball forward and then make quick decisions on how to get the ball into the feet of your teammates with accuracy. Tactical Pulses The Tactical Defending System sends out a series of fast sprints when the defence is under pressure. The closer your players are to the ball, the more the Tactical Defending System sends out these tactical pulses. During these pulses, the defender will almost always receive a higher pass completion rate and a greater number of assists. Quick Long Pass The Quick Long Pass will often be easier on your defender than the Combi Long Pass and is particularly useful for players who are

good at dribbling. Quick Long Passes will fly into the feet of your teammates with a minimal amount of retracing.

Effective Ball Control When you have the ball, you can control where the ball goes simply by passing, dribbling and kicking. This is not the same as a fast dribble; with Effective Ball Control, you can create a clear passing lane for your teammates and dictate the pace at which you want the ball to move.

Effective Ball Control can even cause your backline to push higher up, adding a new dimension to counterattack. This new system will significantly reduce unnecessary long passes and will encourage your defender to make better decisions.

Rapid Offensive Attacks Just like in real life, you can even use the ball effectively offensively.

Intelligent use of the pace and spin of the ball will see the ball swung infield or dribbled into advanced positions.

One thing we can say about these releases is that they're very polished. I'm going to show you what FIFA 14 and FIFA 15 have to offer but first we're going to start with a quick run through of the most recent version. I'm serious about my love of FIFA. I've played it for years and I'm still

going strong. So much so, I thought it was time to share with the world the way I play it, all my latest add-ons, and a few tips & tricks to make your game run like a dream. I've been playing FIFA since the FIFA Classic days, starting on my PlayStation. My first game was FIFA 99, where I was actually an actual player, a defender. I'm not a fan of the days of the pre-game substitution, but I loved the basic control. I spent hours practicing possession by using X, when teams could dribble through the entire defense. (Remember that?) I started with the smaller teams and just played around and got my hands on the controls. Eventually I became known as "Bulldog," and started to play with friends. When you're playing games now, it's all about the controls. What controls do I use? It all depends on my game setup. Here's the basics.

- Network Settings Smart Passes: This is the default and you can turn it off if you're playing locally (if you're on a LAN)
- Advanced Tactics: This will help you

assess your squad, training, and formation during your games. You'll also want to enable the PlayPass option - it's on the main menu.
