In the next version we'll try to include more options like random images, more free space, etc. Don't hesitate to contact us, we're here for support. :) Dipak March 30, 2014 Thanks, I appreciate the update. May I suggest adding options of Mircro-seconds and fractions for the clock, rather than only seconds? i.e $0.25 = 1/4$, etc. We are aware that, in our limited configuration, the number of options seems to be quite limited. But, if you have any ideas regarding making this screensaver more flexible, then we can add the options you suggested. Thanks! For the first time since the global financial crisis, the US economy has contracted in three consecutive months. The shrinking economy was due to a sharp drop in exports, a persistent drop in business investment and a drop in consumer spending, according to a report released by the Commerce Department on Friday. In the aftermath of the 2008 financial crisis, there has always been an exception to that rule: when the global economy has suffered a sharp decline, the US economy has tended to register strong growth. This time around, however, growth has either slowed or even shrunk in most of the major countries, including the US. The UK, Japan and the eurozone economy are all shrinking. Germany's economy has been the exception, and the German Federal Statistical Office has said that the country's economy is still booming despite a sharp drop in manufacturing. 3a67dffeec
