Meet GUNNER! GUNNER is an explosive game of directional control and planning. Destroy the enemy castle by firing different kinds of cannonballs. Aim the cannonballs using the aiming equipment. Place up to eight different platforms and aim them to form a shortcut through the playing field. The more explosive the cannonballs, the more effective your strategy will be. Different types of cannonballs will allow you to destroy different kinds of walls and platforms. Bombastic sound effects will thrill you as the cannonballs start to drop. Create unique chains of destruction with the goal of setting up many cannons and making the enemy castle a smoking wreck. If you find this concept strange, remember: not everyone likes video games! Discover a world of games and graphics, where your screen is all that is necessary! Good luck! Copyright 2016 Ines Media Production

Katakura Hibiki, one of the most talented illustrators in Japan, creates this unique enemy pack known as "MV Monsters". This monster range, which has now been expanded to 8 new characters, adds the eight beasts that most RPG Maker software's standard enemy list lacks. It also includes two cute titans with different expressions, as well as various classic monsters from popular media such as Chinese mythology, Noh, and manga. This pack was created to help enrich the palette of your dreams with an interesting new bunch of enemy bosses, varied enough for even the most hardcore fans of RPG Maker to enjoy! Don't forget to check out more Monster Kits by Katakura Hibiki, like Kitshinogi's "MV Megameru" monsters, set for release on May 12th! You're going to need a disk (or download the ORBITALIS from Steam). After extracting the ORBITALIS to your ORBITALIS folder, launch the ORBITALIS launcher. Drag the game to the left edge of the launcher window, and choose a Disk. There should now be a new option appear in the bottom left of the launcher. Select this new option, then choose a Disk. Give the game a name, then click the OK button. Wait for the ORBITALIS to load, then launch it. A small menu will appear, navigate to options, and then go to settings. Select "Upgrade", then change the upgrade to "Supernova Edition". Press the OK button, then wait for the menu to finish processing, then launch the game. If you're not seeing the extra artwork and soundtrack as expected, then make sure your ORBITALIS is set to Automatic. Lastly, launch the launcher, and select the option "toggle launcher visibility", then navigate to the folder where ORBITALIS is installed. There should now be a small icon, which when clicked will show the launcher, and hide the "extra content" icon. Now you can enjoy all the new goodies that come with this ORBITALIS update! NOTICE: When you launch ORBITALIS after this update, you will need to re-launch it and go to the options menu. In order for this to work, the game needs to be set to Auto, and you need to click the "toggle launcher visibility" icon before launching the game. "Art of ORBITALIS" - A visual art book with over 40 pieces of unique art for you to use in your own mods, themes, graphics, screenshots, and more. An absolute must-have for the lore enthusiast! I just downloaded this as I love the game and the art. I'm sure I'll have to wait at least a few days before I can play this. I wanted to give the artist his proper recognition, along with thanking him for doing such a good job. I have no idea if this was said anywhere but I do like the mood you set for the picture. It's awesome. I have no idea if this was said anywhere but I do like the mood you set for the picture. It's

What's new in Lockdown Hero:

" on the server, if they happen to leave. I am not sure if there is a way to prevent it. A: You could use a move exploit to get the race to full health. Q: Best way to parse text between p tags with JavaScript? I have a string of html that's not formatted nicely. So here's an example:

This is a test paragraph

This is an item heading

This is also a test heading

This is an item body.

With this, I want to parse out the text inside all the

tags and capture everything between the starting tag and it's closing tag. var body = "This is a test paragraph

This is an item heading

This is also a test heading

This is an item body." var text = body.split('

'); I want to loop through the text array and capture the content inside each

tag. I'm having trouble doing it since the text could be on the next line, and I don't want to have to do that manually. Any ideas? A: Since there's no need for a loop I'd use a regular expression as follows: body = body.replace(/

/, ").match(//g); If there's a chance that one

tag might appear inside another, for example

Hullo

There

, then you'll have to be more explicit, something like this: `body = body.replace(/g, '')` Generally, artificial intelligence (AI) refers to a computer system that mimics a human intelligent process. In other words, AI can learn, analyzes, etc. data autonomously and make decisions according to the analyzed data (and other external factors, such as expert systems). According to Moore's law, computing power has increased at a rate of about 60% per year for the past 40 years. This trend can be expected to continue as computing power is made available increasingly in

Blockade! is a FPS, first-person shooter game, set in a blocky 3D world where you can create your own maps and traps. A lots of cool game-modes, including - cooperative, PvP and zombies. Key Features: • Realistic physics - you can build everything you see in game by yourself and destroy it to death, throw a grenade or drop a shell into a gas tank! • Shoot-em-ups - you can always choose between the best weapons, but - what would you use to kill other tankers? • First-person-shooter - be the tank in the first person perspective. See what you are looking through your gun and hear what you are shooting. • Team games - you have more fun with your buddies or gather a clan, so they can be your enemies instead! • Zeds and Broods - you can fight against the undead and powerhungry. • Clan-Tournaments - win and choose to be a champion! • Loot - explore the huge map, search chests and find items to increase your power and your tank's lifetime. • Player-mods - customisation of everything you see in game: your tank, your guns, your accessoires and your properties. • Tons of maps! Create your own map and add it to the map list. • Multiplayer - battle against your opponents on an online server, or battle against our clan-mates in the clan-tournaments! This is a collection of 100% puzzles, what you need to complete 100% of each level. We don't expect you to solve them, you have to figure them out yourself :) You do not have to use precise numbers or solve logical tasks. the game is easy to play, but can be challenging to complete, and the challenge comes from the difficult problems to solve and train the brain. We hope you enjoy the tutorial and hope to see you on the next level. You are the luckiest Youtuber on Earth, not even you can die. Your readers want to see your performance, but instead of one performance, you uploaded 4K, 1440p and standard performance. That's not fair, we want you to jump more and run faster. Let's make it happen. You are pushed into a small room, the only way out is a single key. Your audience's joy depends on you, but this trick is only for the best. Can you walk through the wall?
