## What's New In?

ImageViewer/pakrat.zip View, add, and delete custom.pak files embedded in a compiled HL2 map. Pakrat can scan.BSP file for custom files and automatically add them into the map. Custom files can also be manually added to a compiled.BSP file. Pakrat has the ability to scan the directory containing a.BSP file to find which custom files are used in the map, and automatically add them to the map. This makes it very easy to distribute custom custom files with a map without having to create extra files for them. Pakrat allows the user to use a directory of.pak files instead of individual.pak files. Pakrat V3.2 Pakrat V3.2 has compatibility issues with some BSP files. So if the pak files are causing issues, upgrade to the latest version of Pakrat. I've marked compatibility issues, so if you notice an issue, please let me know.
