The Game is a First Person Shooter survival horror. It will be played in 4 modes: - single and multiplayer PvP mode : You will participate in a PvP arena, where you have to kill the opponent. Each opponent has its own settings in order to deceive you. If you get killed, you lose all the in-game money. You can use item, the opponent is at risk for it. You can win or lose, but it will bring a major score for you (while you get some money) - RPG : One player has one character, with many playable skins. You will win and lose by your gameplay. - Survival : You have one life bar and you can have a weapon. Your main goal is not to kill the opponent, but survive until the end of the match. Your weapon will be a revolver. - 'Til The Last Breath : This is a combination of RPG and Survival. It's like a third game. You have to win, but the most important thing is not to die before the opponent. Between you there is only one life bar, one weapon and a pistol. You also have to collect some important material (Cyanide, gold). This mode is a mashup of the first 3 modes. It also includes a rewarding system - Item is : Using some special items can help you to win your current game. A blue icon will show up at the center of your screen. You can select the items with your right mouse click. The list of the items will change at the bottom of your screen. It will appear a white icon on your character, then "Use" it. - Killing an NPC will add one more important item to your list. You can collect this items by killing a Zombie in the area. They are collected as well as you killed the Zombie. During the killing phase (Til The Last Breath), you can't use Items. During the killing, you will be close to your life bar. Then you will lose all your items and you need to start from scratch. This game is still in development, I can't yet show you the finished end game. The main game will take between 6 months and a year to be complete. I would like to raise the game, which will be a problem to find a publisher to help me. I am open for any kind of deal, take a look at my

What's new in Plenty: Skyhearth:

This plot, if you have not guessed already, is of few people waiting for something to happen, and then when it does, they make a scene about it. If you haven't figured that out already, do read the first chapter of this book, as it is a must before you begin anything else. Day 69 "Um... I don't know if this is at all relevant, but it just came up. I had quite a vivid dream last night, about as lifelike and as intense as any dream I've ever had. It was the first dream I've had in a good while, and was so real I was almost surprised when I woke up. It was kinda like the opening scene from... "I hope this isn't too nosy," I began, looking over my shoulder as I sat down in the Queen's chair in front of the computer. I don't want to come off as one of those obsessive, nagging fans who constantly leave crazy messages on the forums, or whatever. "If this is maybe a bit out of place or not a very good idea, please ignore me. I am 16 years old, and now I suddenly have this absurd, though harmless, amount of fear, not feeling well and having these... dreams. So like I said... This is just personal stuff I think is important, and I don't really know how I should go about asking you. "Anyway, the dream was of a boy from the picture on the court that I just posted. It was those swords from the knight scenes in that pic. It was strange, because of how real it felt, the boy looked so tired and worn out, like he'd been alone and hadn't slept at all for days. I was worried about him, he had such intense eyes. I wanted to do something, but I didn't know what, exactly, and I couldn't move, or even think, I could only watch." I hadn't expected to answer, nor had I expected to make a topic out of it. The Queen looked at me intently, out of the corner of her eye, as if she knew, somehow, that I was sincere in this. "You say you are worried. That is a good sign." She said, sincerely. "Not good, not bad." She added, looking over at me with her golden eyes. "Well, I was watching the boy, and I saw him grab his head, sit down, and ask

----- **ABOUT: We make games! We are a team of creative people, and we specialize in making games in a live-action video game manner. We dedicate ourselves to getting as many people playing our games as possible. - The Spinning Chair Simulator is an Action-Adventure-Game (A-Game), i.e. a game in which you fly your Spinning Chair into space and destroy everything in your path. - You earn money by collecting coins in space, and also by blowing up rocks and other local life. This is how you get to upgrade your chair. - This is an Indie game (most titles are), meaning that we are not concerned with breaking the bank in order to get as many people playing as possible. We strive to keep our budget as low as possible, so that we can give away more of the development progress and demos to the community. - We take pride in our in-game community, i.e. the Spinning Simulator is a game where you can choose between several different player's avatars. So here's the thing: we really want people to feel that we build a community around our games. Play It! ----- HOW TO PLAY: - Tap with your finger to make the chair spin, and try to fly as high as possible - Enjoy PACKAGE CONTENT: ----- - APK (Android) and IPA (iOS) - Resources containing a high-resolution icon (Wi-Fi & internet are required) - Sounds - Multiplayer, i.e. you can play with your friends, and score points - Interface screen - Wallpapers - Download a press release from the Space Box Website!
