The EEOC's governing body is considering a complaint filed by the American Civil Liberties Union on Wednesday and has scheduled a workshop for April 18 to receive public comment on the issue. ADVERTISEMENT The complaint says that while sex discrimination is illegal and boys and girls may have different interest and abilities in sports, there is no scientific basis to segregate them by gender and sex on school grounds. The complainant alleges that this practice is based on antiquated stereotypes of sex differences that are rooted in the Christian creation narrative. The legal complaint, filed on behalf of two students in New Jersey, says they are seeking to be allowed to attend school in the same physical space with other students of the same gender. The complaint notes that the sex segregated school environment is already illegal under Title VII as sex discrimination, even though the issue may not be a priority for the Obama administration. "Although the issue of sexual orientation has not been litigated at the EEOC, we are mindful of the fact that the Supreme Court ruled last year that Title VII prohibits sexual orientation discrimination," the complaint states. "Both parties have a right to a fair and impartial hearing on the issues raised in this complaint." The EEOC has a track record of setting precedents on major issues in favor of civil rights.The most expensive movie ever made before Avatar came along was a film so bizarre and baffling that only a handful of people have even seen it. The film, Night of the Demon, cost $17.5 million to make, and only 20 people - including the director - have seen it. Despite being hailed as a masterpiece, the film

Bitfinex and Tether are two of the biggest names in USD stablecoin. The US OCC has recently investigated Bitfinex, and subpoenaedTether. Both companies claim that their primary business is for USD trading between banks and cryptocurrency exchanges. This isn't what they do. Rather, their money came from high profile institutions and rich people that wanted to get more money into cryptocurrency and the only way to do it was to use USD stablecoins. Tether is a particularly interesting story. They come from crypto. They came from Frank Talk. They were registered in Bitfinex's name, acquired the other company called Tethereum, their CEO was running Bitfinex and the CTO was building Tether. It was all a big mess. Park, AL 09/21/16 Overall Performance Story "Great story!!!" If you've never listened to South Dakota Police Stories, or anything by John Grant, you are in for a treat!!! I love this book! Hard to put down until you reach the end!The characters are superb, all 10 of them! The approach of the characters and their characters lends to create the thematic foundation of the book. If you are looking for a great listen, you've found it! dudleychase Cincinnati, OH 09/14/16 Overall Performance Story "Historically important but hard to follow" This book was far more stimulating than I expected. It tells the story of the notorious Gus Gorman, as he served the people of South Dakota in 1880's. There is some substance but it is very mixed up with local history that is misleading from the standpoints of current justice and political correctness. Gus Gorman was actually railroaded, as this book makes clear. He was an educated, well-trained lawyer who had dedicated his life to be a public servant. He was saddled with a ne'er-do-well brother, prior bad behavior, and family turmoil. This affair looks suspicious to us, but he was a suspect in many other crimes. His past was undoubtedly a factor in making it difficult to convict him. He was defending himself from the prosecutor's accusations, and had no money. Most people in his position would have just kept their mouths shut. He defended himself successfully, but then news of his case spread. Support came from "above" but not from "below". He was railroaded by the justice system. People like him received justice, but we don't know much about it. There is much rhetoric and signposting to show some of the best known problems of the time, but the details are confusing to our modern minds. Although, this story is hard to follow, it is worth reading. Rebbeca B. Amarillo, TX 09/06/16 Overall Performance Story "Not Historical, Brilliant Story" A good story that we should all read and listen, from my humble opinion. A few people out there have jobs. Like the kids at work. But that is no fun. Then there are people like Harold Fletcher. His job is making boring documentaries, to help those without jobs. He is grounded to his room in a misguided way to stop him from making the documentaries. Unfortunately this means he has a lot of time to think about things. He doesn't like thinking. He wants to play video games all day. His friend B. comes by. He is bored too. They have a lot of fun together.
