AutoCAD 2018 was released in May 2018 and was based on Visual Studio 2017 and.NET Framework 4.6.2. AutoCAD 2019 was released in September 2019 and was based on Visual Studio 2019 and.NET Framework 4.7.2. , the product support plan for AutoCAD is an annual subscription. While AutoCAD can be licensed for use in the cloud, the cloud option is limited to the ability to open and save

files. The cloud option does not support other file formats or the ability to use the program as a mobile app. Programming AutoCAD is a product used for 2D and 3D drawing of architectural, mechanical, and electrical engineering systems. It uses a graphical user interface (GUI) that allows the designer to create objects and design in 3D space. The use of the AutoCAD suite of programs allows users to design parts and assemblies for machines, buildings, automobiles, and bridges. AutoCAD's programming interfaces are based on Visual LISP and include RAD Studio, Visual Studio.NET, and ObjectARX. AutoLISP, a macro-based programming language, and Visual LISP, a procedural programming language based on Algol-like notation, were the original programming languages.

Markup Assist displays the current zoom level and view direction, showing the maximum and minimum view when it's appropriate. When your design is imported, it automatically attaches to the current view so you're no longer required to use the Navigate tool. (video: 1:40 min.) New Modeler: Introducing your most powerful design suite ever, the Modeler. Design and analyze your models with new tools, smart analysis, and enterprise-level features like cloud computing. Modeling your designs before writing code is easier and quicker than ever before. (video: 1:40 min.) LiveLink Viewer: Take a closer look with live view in AutoCAD and set up detailed annotations on the part or feature you're viewing, then easily send feedback to the design. (video: 1:15 min.) Smart Components: Automatically and intelligently split complex assemblies into more manageable parts. When you first use Smart Components, you can turn them on or off based on how they're used. You can also specify a default behavior or set them to always appear together. (video: 1:40 min.) Split/Merge: A single annotative command can create dozens of new pieces and update existing parts automatically. Easily merge and split parts, and update existing views of your drawings. (video: 1:40 min.) RevitLink: Get information about your Revit model or design history. Whether you have or need the latest model, or just need to know what has changed in the past, RevitLink will help you navigate and analyze your 3D designs. RevitLink uses the latest annotation and editing capabilities to efficiently capture and share annotations from your Revit files. (video: 2:45 min.) DraftSight for Revit: See your Revit models in great detail and

quickly visualize and annotate elements with the most accurate representations available. (video: 1:20 min.) DraftSight for Revit is a time saving annotation tool that provides the most accurate, custom visualizations, at your fingertips. (video: 1:30 min.) Full screen: You can now take full-screen views of all views and commands. Simply click the Zoom button in the toolbar. Navigate: Use the new Navigate tool
