Q: Adding an HTML5 syntax for a button to a element not working as I expect I have this button: STOP And this css: .button { background: #4aaded; border-radius: 4px; color: #ffffff; cursor: pointer; display: inline-block; font-family: "Open Sans"; font-size: 16px; font-weight: 400; line-height: 16px; padding: 12px 16px; text-align: center; text-decoration: none; width: 100%; } I want that "STOP" word to be centered. I have tried with text-align: center but it didn't work. What am I missing? A: You can use vertical-align: center to achieve the desired effect. button { vertical-align: center; } Here's a fiddle: [Edit](#) You also need to add a line-height property to the button to ensure the space between the text and the button is equal to the line height. line-height: 20px;

1. Field of the Invention The present invention relates to a packaging material and a method of producing the same and, in particular, relates to a packaging material with excellent heat-sealing properties and a method of producing the same.

2. Description of Related Art Conventionally, as a method of sealing a material to be packed, there is well known a method of using heat seal material which is a laminate product formed by applying heat-sealing material on a substrate material and heat-sealing the heat-sealing material, followed by winding up the substrate material. Further, in general, a long roll of film is generally used as the substrate material to obtain a large area of heat
