I have created a C# library and would like to use it as an executable using a Console Application. To my knowledge, the executable should be added to the projects 'References' as a DLL, whereas the library contains the code. I realise that I would need to add a reference to the executable in order to use the library. My question is simply: can one place a C# WPF project within another (library)? Do I need to create a new project for this? A: My question is simply: can one place a C# WPF project within another (library)? I have never tried it, but it shouldn't be a problem. You could add the WPF Project as a reference, and it would get compiled into your library. Do I need to create a new project for this? Yes. Q: Multiplying same row by different column in Pandas I have a dataframe that looks like below: Column Value 0 C1 0.2 1 C2 0.3 2 C3 0.4 3 C1 0.2 4 C2 0.3 5 C3 0.4 I want to multiply column C with value of each row and create a new dataframe as below Column Value
