## **Primordium - Day Zero**

BadLands is a city building, open world, single-player and multiplayer physics based shooter, which takes place in the same universe as the world-famous game Alien Shooter. The whole planet BadLand is the setting for the game, and contains the main objectives of the game - to survive in this hostile environment and protect the society of the people, which is also a real threat to your survival. The game will offer a mature atmosphere in the form of a cartoonish comic and an adult setting, due to the presence of violence, drug use and other forms of tobacco. There will be a choice of three different game modes - City, City Assault and Gallery.

City mode — is an RPG, where the player needs to build up his or her character and win battles with rival gangs. This mode requires fighting on numerous missions, gaining experience and gaining the necessary skills to become the most skilled and famous commander of the Red Zone gang.

Also, in City mode, the player will be able to order the team of special vehicles for escort missions, and will participate in the city defense projects, such as the construction of defense towers, building strong and technologically advanced soldiers, repair damaged city structures, improving the city streetlighting and sewage systems. City Assault is an FPS mode with the traditional character set for the game. It is pure adrenaline, where the player will be able to not only tackle the enemies, but also capture the territories of rival gangs. Gallery mode — takes the player to a cyberpunk art gallery, where the player will be able to buy and sell weapons of various classes, and on each of the maps place the weapons, tools and other items to gain additional inventory space. Thus,

the game combines the beauty of classic city building games with the action of the FPS. Mostly Geek, Occasionally Vegetarian. [Chapter 4] Bonus Chapter 4 This chapter is copyright to me; any story/character based upon this chapter, as well as its related chapters (ch3.1-3.3) must be sent to me via an email: [sliceofrealm@gmail.com](mailto:sliceofrealm@gmail.com), along with the source and chapter number, so I can give credit. Becoming a GM is no easy task; even for those who were born with the ability to be one. Even the most experienced players still struggle with the basic tasks, whether it's managing sessions or running away crying. In my first session, I wasn't c9d1549cdd

This is a simulation of the TS-32 research aircraft. The player takes control of an engineer tasked with managing the development and installation of new technologies in this high flying aircraft. There is so much more to this game than what is in the box and the manual. For all the detail you can learn about this aircraft, there are video tutorials that will give you a brief overview of the technologies that make this an immersive simulation game.
