But it is a bit of a flawed player: the right stick is ideally placed to control sprinting and power slides, but for an athlete who may be unable to use his left hand (or has a weak grip) it is a real pain. To solve this problem, we've created the HotWheels PT 1500Z Snowblower. It's basically a snowblower on four wheels, and it runs on a petrol engine mounted in the middle. There are more than 400 attachments available for this vehicle, so it should provide any modeler with all the tools they need to create a snow scene. We've included a second version of the Snowblower in this set as well, called the HotWheels PT 1500Z Snowblower (2). We've added more attachments to this version, and also given it the ability to be controlled with a second controller. The Snowblower is available for the 3ds Max V3 and the 3ds Max V4. There's also a Max 2014 counterpart available for people who prefer to work with that version of the software. You can download the models from our Downloads page, but if you're interested in getting any of these models you can check them out in the Models section of Maxon's own retail store. There are also a handful of vehicles available to help you create that snowy experience in your scene. We've included a grass truck that's perfect for driving that landscape, a snow plow, a site cleaner that can flatten the ground for your model, snow rolling brushes, and a snow wheelbarrow. This is the first time we've added these models to our community, and we hope you'll have as much fun with them as we have creating them.
