

I have a \$35,000 note which is supposed to be in my name alone. however, my son has \$40,000 in college loans for which he signed promissory notes when he was in college. it seems that by mistake this \$40,000 in loans became part of the \$35,000 I co-signed. I was wondering if there is any way to help my son with these loans. he is 25 now. he is not working and his loan payments are probably about \$200 per month. I don't know how to help him with these loans and I am worried about him. any ideas? I've been using the ftr for about a year now, and have been very pleased with it. however, after today's update I can't print any notes now. when I try to print a note I get the following message: an unexpected error has occurred. please try again later. it seems to be happening only when I use the print button on the note itself, and not when I click on the print button at the bottom of the page. I have a 7 year old and a 5 year old. I have had the ftr app for about a month. we downloaded the free version. I have also downloaded the paid version. it is an excellent way for me to communicate with my daughter when she is away from me. I have used the free version with my 5 year old. he has enjoyed it, but is not a big user, so his notes aren't very long. I have used the paid version with my 7 year old. he uses it much more, and has about 100 notes. it is a great communication tool between us. the app is easy to use, and allows me to communicate with my daughter from anywhere. however, since I have the paid version, it also allows her to communicate with me whenever she wants, even when I am on my phone. I have had no problems with the ftr as far as security or privacy.
