

The Abbey Road drummers Kontakt instruments include a comprehensive mix section, allowing you to control the level, position, and routing of all the individual drum sounds and headphones. You can choose between a selection of custom presets, and create custom settings and loops with the full Kontakt 4 Player, giving you control over the individual sounds, and re-mapping via drag and drop for third party mics, drum software and electronic drum kits. Plus, with built in compatibility with various third-party drum software, you can plug into your favorite drum software and work in tandem in your DAW as you create. The first is a remix of the Abbey Road 60s Drummer Library by CJP, a UK producer and artist with an eclectic musical career that spans dozens of genres. The CJP mix highlights the history of each drum kit with a couple of brand new Grooves, matching the general vibe of each kit, but still bringing in the 80s sounds and groove of the 60s, along with new from the 90s and 00s. It also includes plenty of new "sequenced" grooves, created within the Kontakt environment to replicate a real drum beat, and then easily mapped into your favorite software. If you're more into 60s rock and roll than 60s funk, then the CJP Abbey Road 60s Drummer will be perfect for your next beat. The kit is fully loaded with 40+ acoustic/electric fills, patterns, grooves, and snare rolls and snares at the right beats, all played live by session drummers. Abbey Road is a good drum library made by Native Instruments, and although it's a very new product on the market, it is already complete and has a lot of original sounds and nice articulations that should be worth a good listen. You can find this Kontakt product on the Kontakt site for only \$29.99!
