winsock wlan youtube the final step consists of simply  
turning on the internet connection on your pc and it  
will start to share it with other devices. this might not  
be the most practical solution for those who don't  
have a router nearby, but it's definitely one of the  
easiest ways to turn your pc into a wireless hotspot.  
nowadays, more and more people use a router to set  
up and share wi-fi connection, but sometimes you do  
not have a router near by. luckily, there are several

---

ways to turn your pc into a wi-fi hotspot that will share the internet connection between other devices. in the following guide i will demonstrate you two simple ways to turn your windows pc into a wireless hotspot: one using windows control panel tools and another one using a third-party application. thanks to hcspot wifi hotspot softwares useful and strong features, you will be able to manage your wifi customers at ease. you can easily limit bandwidth quota & bandwidth speed, filter any websites on the fly, create advanced connection rules and many more.

### **Hcspot Wifi Hotspot Full 11**

pair-wise (bip-pairing) wifi hotspot connection uses just two or more routers instead of configuring them individually, with hcspot wifi hotspot software you will be able to have unlimited access to more than 1000 routers within your home or business. the sophisticated traffic and bandwidth distribution feature of hcspot wifi hotspot software, ensures that your internet connections are secure, up to date and steady. you can also control your internet bandwidth very easy using this tool. hcspot wifi hotspot software makes sure that your internet is safe. detecting and blocking unknown websites, ip addresses, hosts, domains, keywords will also make the internet safer for you and your customers. hcspot wifi hotspot software allows you to set/get the various options and

settings in a very easy way. you can speed up wifi connectivity and manage all your devices from one single dashboard and website. have you ever experienced any connection failures while you want to create a hotspot or you are using it? if you have, then you will definitely come across this issue with hcspot wifi hotspot software. hcspot wifi hotspot software cannot make any active connection to the router. make sure that the router is connected to the internet. if it is so, then check the access point for the wifi router to ensure that it has at least one profile already created. it will not create it for the first time. ip address is the most important thing in setting up a wifi hotspot. ensure that you give right address in settings of the router. if you give the wrong address, it will create the hotspot but it will not connect to the router.
