Gwen and Andre's first date - Two heads are better than one.. she tells Andre she loves him on her birthday, and Andre's response is...The embodiments herein relate generally to the field of power sources for power tools, and more specifically, to battery charging devices and methods. Generally, traditional power tools have a positive and negative terminal connected to an energy source such as an AC outlet to produce the desired output. The output power of the power tool varies based on the type of output device being used. As such, the type of output device also determines the energy source that is used to charge the batteries or power source in the power tool. Thus, a conventional power tool battery charger is typically connected to a particular type of power tool or battery for charging.The statements in this section merely provide background information related to the present disclosure and may or may not constitute prior art. A typical multiple speed transmission uses a combination of friction clutches, planetary gear arrangements and fixed interconnections to achieve a plurality of gear ratios. The number and physical arrangement of the planetary gear sets, generally, are dictated by packaging, cost and desired speed ratios. While current transmissions achieve their intended purpose, the need for new and improved transmission configurations which exhibit improved performance, especially from the standpoints of efficiency, responsiveness and smoothness and improved packaging, primarily reduced size and weight, is essentially constant. Accordingly, there is a need for an improved, cost-effective, compact multiple speed transmission.Q: Exception handling, are these two exceptions valid? So, I am following this source: Are these two exceptions valid? FormatException RangeError I mean, the reason why I am asking
