DFM2HTML is developed to help you easily edit HTML projects using drag-and-drop support. It also implements a DTHML menu designer, along with intuitive and advanced features, such as anti-aliasing mode. Quick setup and user-friendly GUI The installation procedure is a fast and easy task that shouldn't impose any difficulties. As far as the interface goes, DFM2HTML adopts a large window with a simple structure which invites you to create a new project from scratch or sample file. Easily adjust settings So, you can change the font style, size and color along with the

background color, apply the Bold, Italic, Underline or Overline effect, alter the margins and padding, place a border and set its width, insert images from files, color or gradient, enable anti-aliasing mode for text, apply the blur effect, as well as rotate, scale and skew objects or make them transparent. Upload via FTP and use additional tools A search function is put at your disposal for locating text from a selected object or the entire scope. Moreover, the project can be saved to file and resumed at a later time, as well as uploaded to a website via FTP by indicating the host, port number, user name, password and directory. Furthermore, DFM2HTML lets you externalize photographs, study tutorials, use explorers for objects and resources, switch to another language for the interface, edit page properties, and so on. Evaluation and conclusion There were no kind of stability issues in our tests, thanks to the fact that DFM2HTML did not hang, crash or pop up error dialogs. It executed commands rapidly and used a low amount of CPU and RAM, so it didn't affect the overall performance of the computer. All in all, this software application comes packed with some handy options and customization preferences for editing HTML pages.
