TinEye Reverse Image Search is an extension to find the original sources of pictures on the Internet. The TinEye Reverse Image Search feature finds the original sources of a picture, by searching on Google, Bing or Yahoo (using image meta data from the internet) to find the source of the picture that has been posted on the internet. TinEye works like a reverse image search engine for images. The TinEye search engine locates the original sources of images based on image meta data, not file content. It does not use any unique rights, or any metadata that is normally used by copyright holders. About TinEye: TinEye is a web image search engine for pictures. It provides users with easy access to the most popular images in billions of web pages. For more information about TinEye, visit: Shareware; Free Download at $39.99 subscription fee. What's New in the TinEye For Firefox?

Post navigation 10 Comments Timmy May 23, 2011 at 6:10 am Ive tried with lightbox mod and you also, no way to understand what was happened. Hhahahaha.. @Timmy. I couldn't understand what happened, either. But you don't need to worry about it. I've tried using TinEye with Opera. It's working fine. I'm not sure what happened with your installation. Moe May 23, 2011 at 7:41 am What you got? What happened? In fact I was just talking about the latest version of TinEye and how it had the problem of not giving you options to set which image to search for. The last version of TinEye is 1.3.7.4.5. They said that they've fixed it, but it looks like it was just a very old version of TinEye. Thanx for the tip. Julie May 23, 2011 at 10:16 am Is it possible to search a specific photo ID for TinEye? I had an ID number in an earlier incarnation of my blog that I would like to re-use. The TinEye extension seems to search and display an infinite amount of results. Is there any way to limit the search to one result?October 06, 2007 At the Heart of the War The War on Terror began as a war on terror at the site of the World Trade Center. The United States and its allies have been attacking the Taliban in Afghanistan because of what happened on 9/11. This is a war that has created a new government for that country, made it safer for its people, and has changed the course of its history. The Taliban, to this day, attacks other countries and has morphed into a terrorist organization. Perhaps, our own president has already missed this boat, and the opportunity to change the course of our history by driving a wedge between the Muslim world and the West. What he has done is to alienate another important world power. To say that he has, as some of his advisors have done, ignored the issue by not addressing the subject with the same seriousness as he has addressed other issues may be an understatement. He missed a historical opportunity and will pay for it. The History of Afghanistan The history of Afghanistan is complex. It has been invaded by many empires over the centuries, and was influenced by such civilizations as the Greeks, Romans, Turks, and Mongols. It was once a great empire itself, which defeated the Indian Empire and Persia. When the Soviet Union came to power in Afghanistan, it took over as the government, and, under their rule, the country remained under the complete control of Moscow. The United States and NATO invaded Afghanistan in late 2001 and toppled the
