Photomark

Keymacro is a lightweight, easy-to-use and intuitive software that allows you to create macros, including movie titles and screenshots. It can be used to make simple macros which you can easily execute, or you can use it to create movie titles or screenshots, depending on the type of macros that you wish to create. Keymacro is very easy to use, with an intuitive interface, which allows you to enter the information that you need to create the macro directly into the program. In addition to the macro itself, you can define information regarding the title of the movie (movie title) or information regarding the screenshot (Screenshot title) and the file (Screenshot file), so that the information will be displayed in the macro before execution. The information can also be entered into the program by scanning the images that you wish to add the information to, without having to open the images in the program itself. You can set the resolution of the movie (movie resolution) or the resolution of the screenshot (Screenshot resolution) and the duration of the movie (movie duration) or the duration of the screenshot (Screenshot duration), to ensure that the movie or the screenshot will be created correctly. The use of such information in macros is especially helpful if you wish to create a movie that can be executed in the same manner as another movie that you have already created. You can also use the information to choose different versions of an image. In addition, you can define the appearance of the movie and the appearance of the screenshot with various properties, such as position, size, number, effect, transparency, brightness, and contrast. Keymacro provides you with the possibility to execute the created macro in any file that you select, and you can choose the language in which the macros will be created. The tool allows you to create

different types of macros, including movie titles, screenshots, and different movie resolutions or movie durations. All in all, Keymacro is a very easy-to-use application that allows you to create simple macros for any purpose that you may need.

HighlightPlay Pro Description: HighlightPlay Pro provides a tool for creating and downloading highlight reels and highlight videos. It can create highlight videos for any type of video, whether it is a highlight video, a highlight reel, or a highlight mpeg, as well as it can download these files for any type of video file. Photomark With Product Key [32|64bit]

Photomark v.1.0.6 is a very intuitive software for creating high-quality watermarks. The program supports a wide range of image formats, including JPEG, TIFF, BMP, and PNG.

Tumbli 4.4 (x86/x64) | 15.7 MB
Category: Screen Recorder
Download: Tumbli 4.4 (x86/x64) | 15.7 Mb

Tumbli is a tool that provides you with the possibility to record screens in high quality (in slow motion), and in the ideal format for many different purposes. It can be used to record screen in high quality, in slow motion, to create video tutorials, as a security tool to watch over your PCs or other devices, to help you study something or to demonstrate your skills or knowledge, to record and play lectures, to create presentations and so on. With this software you can:

- Record your screen in slow motion;
- Create video tutorials;
- Protect your PC and record your desktop;
- Record and play lectures;
- Record and replay lectures;
- Record and play video games;
- Record and save Internet broadcasts;
- Help you study something;
- Record and view video tutorial on Windows Movie Maker.

Key features:

- Record and save your screen in high quality, in slow motion, in multiple formats;
- Create a presentation of your screen;
- Record and record your voice;
- Record audio from your microphone.

Tumbli is a cross-platform software that allows you to record, protect, edit and playback video in multiple formats. As the name implies, the software uses the "tumbler" feature (similar to the one in Gmail) and allows you to navigate in a kind of "slide" window, from which you can choose the area of the screen you want to record, in slow motion or in normal speed, and then save the video in any of the supported formats. The interface is very intuitive and the program is able to record video with perfect quality at any resolution, with a maximum resolution of 2560 x 1600, and in almost all the different supported formats, such as AVI, MPEG, WMV, MP4, and so on. The software also supports recording in MP4 format (with both progressive and interlaced playback) in different resolutions, as well as audio in multiple formats (mp3, m4a, ogg, wav). The application can be used to record videos for a wide
