Apple's top ethics watchdog co-authored a guide for employees that includes a product recall - tintinnabula ===== t3hSpork It was inevitable that Apple would put a product recall on the table with those "immersive" videos of the children disappearing. I'm sure the company had a back-channel plan in place for similar scenarios, but it's pretty rich that they had to broadcast it publicly. ~~~ KenanSulayman Not sure what kind of service you are providing, but this is simply false. That was never Apple's plan. The present invention relates to an optical input amplifier, and more particularly to an optical input amplifier for use in a light amplifier circuit in an optical transmission system, or the like. A conventional light amplifier circuit is shown in FIG. 9. Here, for example, a photo diode PD1 to which light from an optical transmission line is applied is adapted to be driven by a photo diode driving unit PDDR. The photo diode driving unit PDDR includes an output monitoring unit 1 which monitors the amount of light received by the photo diode PD1 and outputs a light quantity level signal In. When the light quantity level signal In has an ON or OFF state, the photo diode PD1 is driven to be fully ON or fully OFF, respectively. The output signal from the output monitoring unit 1 is inputted to a photo diode amplifier 2 in which an electrical current supplied from a bias voltage VB is halved by a photo diode current mirror circuit to obtain a photo diode current in accordance with the light quantity level signal In. An optical amplifier 3 is constituted by a light emitting diode, and an optical attenuator 4 is constituted by a
