But, I can't understand this part. layer = iface.activeLayer() #iface is the QGIS instance. user_icon = QgsProject.instance().iconTheme('user.svg') layer.setIcon(user_icon) My question is how to customize the user's image icon for a particular layer on QGIS. Actually, I have searched in other apps like word, Excel, etc. through customize user icon. How to achieve my goal in QGIS? A: I haven't understood your question, but i will try to help. The icon can be defined by setting the layer's Style like this (no idea if it's the best way, i'm an ex-cartographer) layer = iface.activeLayer() #iface is the QGIS instance mystyle = QgsStyle('mystyle') layer.setStyle(mystyle) After this, the icon for the selected layer will be defined by this style. You can download icons from the QGIS gallery. You can also use a custom svg icon. I have done this in the past. Its quite simple, like this: mypath = '
