What are the valid values for file.createdate? I need to read a file, and store some data to this file. To do that I want to know the current date, so I can store the time it was created. I am taking input from user and populating a property, and using:

```
File.SetAttributes(fullFileName,  
FileAttributes.Normal);
```

to set attributes. I can store the date of creation like this:

```
File.SetAttributes(fullFileName,
```

---

FileAttributes.Normal); DateTime?  
createdDate =  
File.GetLastWriteTime(fullFileName);  
but the documentation on  
File.GetLastWriteTime says: Gets the  
date and time when the file was last  
written to. So I'm not sure what is the  
valid values for  
File.GetLastWriteTime(fullFileName).  
The reason I need to check the date of  
the file is that I want to check how  
recent it is that this file is. Any ideas?  
A: According to the documentation  
File.GetLastWriteTime() returns a  
DateTime object with a value that is

---

"the date and time when the file was last written to". To figure out whether a file is new you need to compare that value to your current system time, so you need to get a value for that. The System clock is always correct, and it is very unlikely that a change to the system clock will happen at the same time as the writing of a file.

Technology is transforming the way we handle waste. From innovative systems using recycled materials to the creation of recycled housing developments, there are plenty of ways in which technology is helping us to take back

---

our waste and turn it into something else. You may be familiar with the idea of recycling, but did you know that the same process can be applied to a wide variety of waste, from food waste, to packaging and more? But first, here are a few things you probably aren't aware of that can make a huge difference to your recycling: Recycling is more efficient than putting things into landfill It's more environmentally friendly It's good for business It can make recycling more convenient Recycling is good for the economy If we
