Why you need Printer Spooler Utility: When you need to do something with all your printer jobs, it's important to have control over what's being printed. Windows comes with a service called 'Printer Spooler' that is responsible for taking your print jobs and spooling them in the correct order. Because this service can take a long time to complete, you can make a mistake and complete the print job by accident. In the old days this was a big problem, as you could simply disable the service and the printer would stop working, but not anymore! Now you can use the Printer Spooler Utility to get rid of all of your print jobs before you even get around to printing them. Printer Spooler Utility is designed to help you get rid of print jobs that are taking too long to complete. By using this utility you can start or stop the service immediately, so you can remove print jobs immediately if your printer gets stuck. If you haven't been using Printer Spooler Utility for a while, it might take a bit of time to familiarise yourself with the new features.
