Leveraging the input from this survey, our business strategy team has developed a forecast of CAD spending growth for the global market. The forecast is presented as a five-year plan from 2018 to 2023. Our forecast is based on an analysis of recent data and research. By examining the data in

---

detail, we were able to explore trends that are not readily apparent in aggregate data and provide a more detailed view of the market. The global CAD market is expected to grow at a CAGR of 2.4% during the forecast period. An upsurge in the construction industry and expansion in the infrastructure sector in the Asia Pacific region are two key drivers of the

---

growth in the CAD market. Furthermore, the industrial manufacturing and automotive sectors in Asia Pacific are the two fastest-growing sectors of the CAD market. In contrast, the CAD market in North America is expected to witness moderate growth during the forecast period owing to the presence of high-end CAD vendors such as Autodesk, Dassault

---

Systemes, and Mitsubishi Electric Engineering Systems. This analysis covers a comprehensive overview of the current state of the CAD market, its dynamics, and future trends. It also provides an in-depth analysis of key market segments, revenue forecasts for these segments, and an analysis of their growth drivers. An analysis of the total market

---

and subsegmentation based on applications, deployment modes, and region In-depth analysis of the historical performance and development dynamics of the CAD market In-depth analysis of CAD market segments and the geographic distribution of each segment The CAD market has been segmented as follows:  
Service Product

---

Deployment Application  
Region The cloud, a subset of the services market, has been included in the analysis because this segment accounted for the highest share in the market in terms of revenue in 2017. In the product segment, the desktop segment is estimated to account for the largest share of the global CAD market during the forecast

---

period. According to the 2017 edition of the United States Census Bureau, the total population of the United States in 2017 was 324.14 million, and the population of urban areas was 199.58 million.

According to the United Nations Population Division, the growth of the world's urban population was projected to be 39% by 2050. Rapid urbanization in

---

developing economies and increasing requirements for infrastructure in the industrial and automotive sectors are driving growth in the infrastructure and construction sectors, which

the command palette  
AutoCAD's command palette is a command center where a user can search through and

---

execute commands to modify the current drawing. The command palette is activated with the key combination Ctrl+Shift+P and can be accessed by right clicking in the drawing window. Autodesk also offers Dynamic Input, which allows users to interact with a drawing in a different way than in the typical two-dimensional GUI. Dynamic Input allows

---

a user to use two and three dimensional space, which can be used for animation, 3D modeling, building design and architecture, and for a number of industrial and business applications. Dynamic Input is best used in conjunction with AutoCAD's Dynamic Input Panel, which allows a user to type information into the drawing, while also using other controls and
