BatchRename Pro

BatchRename Pro is a piece of software that gives you the possibility of setting various rules for renaming files. It can be handled by users of any level of experience. The interface of the application is intuitive and simple to work with. Thanks to the file browser and folder view, you can easily locate and select files for processing. All you have to do is move them to the right pane via 'drag and drop'. Here you can view the source and output path, along with the renaming result for each item. When it comes to rules, you can add suffixes and prefixes to the filenames, convert pictures to other formats (e.g. BMP, GIF, JPEG, PNG), use the date and timestamp, delete a specific part of the filename, rotate and flip pictures, as well as change the string case, just to name a few. Furthermore, you can create categories in order to filter the rules, fully customize BatchRename Pro's layout (e.g. hide the folder tree and status bar), preview pictures in a small, built-in viewer, save settings for further processing and check out an error report. BatchRename Pro comes bundled with an extensive range of configuration options for experienced users. It runs on a low-to-moderate amount of system resources, contains user documentation and quickly finishes a task. The app did not cause us any problems during our tests. Not sure what to do first? Here is a suggestion for a solution: 1. Export the CSV file which is saved in folder to PDF format. 2. Take the PDF with the CSV file and start the BatchRename pro program. 3. Allow BatchRename Pro to import the CSV file. 4. Now when any picture is selected, it should be imported to the given folder. Please send me a message when you create the trial version because I would like to purchase you application.
