The feature showcases a number of on-pitch animations and ball physics to match the player's style on both attack and defense. Motion capture data from FIFA 22 lets the game deliver more realistic ball movement and ball touch, as it replicates the unpredictable and unpredictable trajectory of real footballs when they receive air, are

struck, are deflected or are controlled by a player. The controls of real-life footballs can only be approximated in video games. FIFA 22 is the most ambitious and complete football game ever created, with over 300 realistic player and team animations, with more on the way. This includes specially created club-unique player character models. Player character models include: • Four new localizations, including English, French, German and Italian • Five new goalkeepers, including the all-new FIFA 12 goalkeepers' kit • Three new defenders, including FIFA 12 Pro-Defenders' apparel

Gameplay Features: FIFA 22 introduces "HyperMotion Technology," which uses motion capture data collected from 22 real-life players playing a complete, high-intensity football match in motion capture suits. The data collected from player movements, tackles, aerial duels and on-ball actions is used to power FIFA 22 gameplay. FIFA is the most successful sports franchise of all time, and has sold more than 215 million copies worldwide across both retail and digital platforms since its debut in August 1994. An all-time global leader, FIFA has more players than any

other sports franchise, and the most followers on social media.

Everything is perfect.

This FIFA is so near the real thing it's almost scary. The balance of the teams, the gameplay, the players, the stadiums, the graphics, everything. The only thing that separates this from the real deal are game modes that are not included as a part of the game but would otherwise be in a real game. Biggest let down is the fact that FIFA 19 is better than this one. If you enjoy playing a soccer game then this will be an enjoyable game to play. The game is very

easy to learn, but the mechanics that work for a lifetime, doesn't. Graphics look great in this game, but the annoying slow reaction time is a constant problem. My only gripe with this game is that EA has done away with the manual, for some reason. This is very annoying, since it relies on a d-pad to control passing, shooting, etc. The game requires you to press the left stick to pass, which doesn't feel natural to an F1 player. Also, the first few hours of the game are spent learning the game, and a manual would have helped a lot. This is a great game that even

casuals can enjoy. I do, however, have issues with some of the items and weapons in this game. I love that EA has added a slew of new features like “Real Player Motion Technology”, which is like a “Hovercam”, the game has the new free kicks, penalties, headers, and shot animation. The players’ moves are made to seem more natural than before (which I really liked in fifa 17). This is a complete reimagination of gameplay that doesn’t just take simple elements from the real game and use them for a new game (like

4th place). This game feels like FIFA 17 and has improved mechanics but does not add new content like the recent update. I am not a pro or a casual player, but I found the game to be flawed in a few areas with chemistry, pass directions, and wingers. The mechanics are easy to get used to,
