Pdf. mU'U. conseillez vous de la lecture des trois derniers chapitres d'3[3] e mieux A. Need help with the following requirement: A list of customer data is written into a file, to run twice the system is needed. First time, the list should be read out, and all the customers with their product features in a string array with their own string array at the end. The second time, a user should be able to look for a customer in the string array and print out all the product features in that particular customer. I have made a test here. Greetings Peter
