## LiveSuitPack 109 ##BEST##

Android Flasher Flashing android with the help of livesuit and other tools. This will help you to understand how to flash a device, and what are all the steps needed to update your device to android 4.0. Extract this file in your PC or MAC (or) in your SDcard on your device. Copy and paste the bootstrap.txt file into your external SDcard of your Android device, and then connect it with your PC using USB cable. 12, A13, RUU, or CWIP version (slow flashing). Extract the zip archive in the live suit folder on your device. Now, open livesuit.exe on your computer. Step 1: Connect your device with computer, then open the livesuit on your computer and connect it with your device using the specified USB cable. Step 2: Next, hit the Start button to open the file manager. In the left panel, right click on the folder icons to open the file manager. Then, navigate to the extracted folder which has been extracted from the zip file using the file manager. In the file manager, select the bootstrap.txt file and hit the Open key or click on it to open it. Next, click on the OK button to confirm the file. You will notice a new folder in the root directory with the same name as your device. Now, connect your device with PC and check if any of the files is extracted. Now, navigate to the newly created folder which has been created in the root directory, and click on the green icon with AVD. Step 3: In the AVD Manager, select the ARM EABI v7a (x86) from the ABI dropdown. After selecting ARM EABI v7a (x86), you will see an instruction of what a device needs. This instruction tells LiveSuit how to flash the firmware. Click on the Firmware tab to see the list of files that is needed to flash the firmware. Step 4: Now, download the firmware of the device and the latest firmware version. In this case, download the googleApi-19.0.2-0.apk.zip. Next, download the above zip file which has both firmware files needed to flash the firmware. Finally, download the live suite. This is a utility which is used to flash the android firmware without damaging the bootloader or any other files. Now, open the livesuit tool and click on the AVD
